DETAILED ACTION

This office action follows a response filed on July 18, 2005. Applicants have amended claims 1-5 and 7-12. Claims 6 and 13 were canceled.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 and 7-12 provide for the use of a rubber composition in forming a tire, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1-5 and 7-12 are also rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1-3, 8, 9, 10, and 12 are rejected under 35 U.S.C. 102(a) as being anticipated by Araki (JP 2002-69236) for the same reasons set forth in the previous office action.

Response to Arguments

5. Applicant's arguments have been considered fully. In the previous office action, the subject matter of claim 6, citing the bound styrene content of 20-60 wt %, was not disclosed in Araki (JP 2002-69236). The recited bound styrene content pertains to the styrene-butadiene copolymer of the Markush group of the parent claim. The other element in the Markush group is polybutadiene rubber. The prior art of Araki also discloses use of polybutadiene rubber for making retreaded tire in paragraph [0017]. As such, the rejection remains in force.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Prior Art

6. The prior art made of record in the accompanying PTO-892 was not relied upon, but it is considered pertinent to the Applicant's disclosure. The following references have been cited to show the state of the art with respect to use of alkylene dithiosulfates in rubber compositions. Two notable references are summarized below.

Yamagishi *et al.* (JP 2002-362107) discloses use of sodium 1,6-hexamethylene dithiosulfate in conjunction with tetramethyl thiuram monosulfide in polybutadiene compositions.

KR 2002-49429 discloses use of 1-3 phr of sodium 1,6-hexamethylene dithiosulfate and 0.1-0.5 phr of a thiuram-based vulcanization accelerator for curing natural rubber.
